

Who is Eligible?

The PNM AC Tune-up program is for all non-residential customers who own or manage a building with an average annual energy usage of less than 750,000 kWh.

The energy savings from installed measures must occur on a meter with an eligible rate schedule.

Make Your HVAC System Up to 20% More Efficient

The PNM Advanced AC Tune-up program-trained professionals provide diagnostic and inspection services to improve the efficiency of your commercial Heating, Ventilation, and Air Conditioning (HVAC) system.

PNM Trade Allies

Partners in Peak Performance, Improved Reliability, Comfort, and Energy Savings

When your HVAC system needs an inspection, don't settle for a simple service spot check. Work with a PNM Trade Ally to inspect and maintain your system at a quality level that meets national standards.

For a list of trade allies, go to www.PNMEnergyEfficiency.com

It's Not Just a Typical Tune-up

Qualified PNM Trade Allies will test every component of your HVAC system, ensuring that each is operating to full capability. Coupled with their energy efficiency expertise, PNM Trade Allies perform a comprehensive assessment of the safety and efficiency of your equipment.

They will: ○ **Check and Correct**

- Thermostat operation
- Refrigerant charge
- Electrical system
- Airflow

○ **Inspect and Clean**

- Air Handling Unit and motor components
- Condenser coil
- Condensate drain

○ **Inspect and Replace**

- Drive belts
- Duct seals
- Air filter

○ **And more...**

The Key to Efficiency: An Advanced AC Tune-up

The American National Standards Institute (ANSI), the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the Air Conditioning Contractors of America (ACCA) collaborate to maintain the Standard 180 Quality Maintenance protocol to ensure thorough, quality inspection and maintenance of commercial building systems.
