

New Construction Program

A ground-up, comprehensive approach to high-performance buildings

The New Construction Program offers incentives for implementing more efficient designs and exceeding code requirements during new construction.

New Construction Prescriptive Rebates

Earn rebates for installing qualifying equipment from a pre-set menu in new buildings. Common new construction measures include:

- Heating, ventilation and air conditioning (HVAC) equipment
- High-efficiency food service equipment
- High-efficiency ice makers
- LED lighting & controls

Earn rebates when reducing energy use with a system improvement that is not included in the prescriptive menu. Custom rebates are calculated using \$0.08 per estimated first year kilowatt hour (kWh) saved.

New Construction Lighting

Rebates for new construction lighting projects are calculated at \$0.53 per watt reduced for interior and \$0.63 per watt reduced for exterior. The

watts-reduced value is based on Lighting Power Density (LPD) in watts per sq. ft. and is calculated as the LPD values for the new lighting less than baseline LPD values listed in ASHRAE 90.1-2016 for various building types.

Whole Building Performance

Eligible commercial customers may elect to use a whole building approach to efficiency. The whole building new construction rebate includes the

following opportunities:

- 10% to 20% electricity savings beyond ASHRAE 90.1-2016 \$0.10 per kWh
- Greater than 20% electricity savings beyond ASHRAE 90.1-2016 \$0.12 per kWh

Authorized Contractors

PNM Authorized Contractors can provide you with estimates, install equipment, and assist you with the application process. View a list of Authorized Contractors by visiting pnmenergyefficiency.com/findacontractor.

PNM provides rebates for energy efficiency improvements.
